

**REMARKS**

Claims 1-7 are pending in the present application.

The Examiner has required election in the present application between Groups I, II and III, as set forth on page 2 of the outstanding Office Action.

**For the purpose of examination of the present application, Applicants elect, with traverse, Group I, wherein claims 1-4 are directed to the elected Group and are drawn to the process of preparing the compound of formula I.**

Applicants traverse in that there is no undue burden to search the other Groups. The Examiner states that Group I is a mutually exclusive species from that of Groups II-III. Claims 5-7 (also shown as Examples 1-3 in the present specification) are directed to specific compounds. However, claims 1-4 are directed to a method using a compound of formula II (an intermediate), and any consideration of such a formula would also mean consideration of the specific compounds of claims 5-7. The Examiner has also not shown how the intermediates would be used for some other final product, or identified the final product (Office Action, paragraph bridging pages 2-3). Rejoinder is respectfully requested.

***Related Application***

As the Examiner is presumably fully aware, Applicants note for the record that copending Application No. 10/572,409, which is assigned to the same Examiner, is directed to a method for making quetiapine. It is submitted that the claims of the present application and the related copending application are patentably distinct; however, Applicants want the record to reflect that the Examiner has been advised of the existence of the copending application. Also, an
